

## Course Overview

Our confined space training courses covers the skills and knowledge required for safe entry to confined spaces under a work permit and for maintaining safety while working in the confined space. Participants are guided through recognition of typical hazardous conditions relating to confined spaces including; oxygen depletion, combustible atmospheres and atmospheric contaminants. Armed with the knowledge to identify potential hazards, participants learn how to assess a task, control the hazards and develop and implement safe work practices.

Learners also cover duties of confined space operators, standby personnel and rescue crews are presented in a combination of classroom and practical activities; leading to an assessment and entry of a confined space under controlled conditions, which is followed by a simulated rescue. Participants are encouraged throughout the program to develop, participate and apply skills in the safe management of confined spaces; from identification and planning through to execution and completion of confined space activities.

Employees should receive training in confined spaces if they:

- Design, modify or conduct works on or in confined spaces
- Are involved in processes to identify or conduct risk assessments on confined spaces
- Enter or work within confined spaces
- Undertake the role of the standby person
- Participate in confined space rescue or emergency procedures

## Subjects Covered

- Legislation
- Hazard Awareness
- Respiratory Protection
- Gas Detection & Atmospheric Monitoring
- Equipment
- Safe Work Practices
- Rescue & Emergency Procedures

## Refresher Training

Industry recommends that refresher training for Confined Space Entry should be completed every two years.

**Duration:** 2 Day

**Group Size:** 1-12

**Location:** This course can be trained at our Training Facility or at your workplace.

## Certification

As we are a Registered Training Organisation (RTO) our participants will be awarded a Nationally recognised Statement of Attainment on the successful completion of the training and assessment for this course.

The unit of competency covered in this course is:

**MSMPER200 Work in accordance with an issued permit**

*(this unit is a pre-requisite for MSMPER205)*

**MSMPER205 Enter confined space**

**MSMWHS100 Follow WHS procedures**
