

CONFINED SPACE ENTRY REFRESHER

Course Overview

Our confined space training courses covers the skills and knowledge required for safe entry to confined spaces under a work permit and for maintaining safety while working in the confined space. Participants are guided through recognition of typical hazardous conditions relating to confined spaces including; oxygen depletion, combustible atmospheres and atmospheric contaminants. Armed with the knowledge to identify potential hazards, participants learn how to assess a task, control the hazards and develop and implement safe work practices.

Learners also cover duties of confined space operators, standby personnel and rescue crews are presented in a combination of classroom and practical activities; leading to an assessment and entry of a confined space under controlled conditions, which is followed by a simulated rescue.

Participants are encouraged throughout the program to develop, participate and apply skills in the safe management of confined spaces; from identification and planning through to execution and completion of confined space activities.

Prospective participants in this refresher course are people who already hold these competencies and are looking to have their skills and knowledge recertified due to:

- Gained their units of competency more than 2 years prior
- Had their skills, knowledge and currency assessed more than 2 years ago
- Have not worked in or around a confined space for an extended period of time

Pre-entry Requirements

To be eligible for refresher training, students must have completed confined space training within the previous two years of the course date.

Subjects Covered

- Legislation
- Hazard Awareness
- Respiratory Protection
- Gas Detection & Atmospheric Monitoring
- Equipment
- Safe Work Practices
- Rescue & Emergency Procedures

Refresher Training

Industry recommends that refresher training for Confined Space Entry should be completed every two years.

Certification

As we are a Registered Training Organisation (RTO) our participants will be awarded a Nationally recognised Statement of Attainment on the successful completion of the training and assessment for this course.

The unit of competency covered in this course is:

MSMPER200 Work in accordance with an issued permit

(this unit is a pre-requisite for MSMPER205)

MSMPER205 Enter confined space

MSMWHS100 Follow WHS procedures

Duration: 8 Hours

Group Size: 1-12

Location: This course can be trained at our Training Facility or at your workplace.
