

Course Overview

Our Issue Work Permits course covers the skills and knowledge required for personnel who may be responsible for monitoring and controlling work permits within their workplace.

Participants are guided through to course to understand the permit system, know the limitations of each permit, and to make decisions regarding the need for and correct use of each permit.

Our training course includes the issue of any and all permits and applies to the issuing of permits covering a single plant or plant area such as might be an operators scope of responsibility.

Participants should receive training in issue work permits if they are required to issue appropriate permits to work to persons conducting a variety of activities in the workplace environments in which hazards exist or specific procedures need to be followed and monitored to protect the safety of personnel and the integrity of plant or process.

Subjects Covered

- Job Safety Analysis (JSA)
- Job Hazard Analysis (JHA)
- Job Safety and Environmental Analysis (JSEA)
- Task Risk Assessment (TRA)
- Safe Work Method Statement (SWMS)
