

Confined Space Entry Training

Course Subjects & Overview

Subjects covered:

Legislation
Respiratory Protection
Equipment
Rescue & Emergency Procedures

Hazard Awareness
Gas Detection & Atmospheric Monitoring
Safe Work Practices

Course Overview:

Our confined space training courses covers the skills and knowledge required for safe entry to confined spaces under a work permit and for maintaining safety while working in the confined space. Participants are guided through recognition of typical hazardous conditions relating to confined spaces including; oxygen depletion, combustible atmospheres and atmospheric contaminants. Armed with the knowledge to identify potential hazards, participants learn how to assess a task, control the hazards and develop and implement safe work practices.

Learners also cover duties of confined space operators, standby personnel and rescue crews are presented in a combination of classroom and practical activities; leading to an assessment and entry of a confined space under controlled conditions, which is followed by a simulated rescue. Participants are encouraged throughout the program to develop, participate and apply skills in the safe management of confined spaces; from identification and planning through to execution and completion of confined space activities.

Employees should receive training in confined spaces if they:

- Design, modify or conduct works on or in confined spaces
- Are involved in processes to identify or conduct risk assessments on confined spaces
- Enter or work within confined spaces
- Undertake the role of the standby person
- Participate in confined space rescue or emergency procedures

Certification

As we are a Registered Training Organisation (RTO) our participants will be awarded a Nationally recognised Statement of Attainment on the successful completion of the training and assessment for this course.

The units of competency covered in this course are:

MSMPER200 Work in accordance with an issued permit (this unit is a prerequisite for MSMPER205)
MSMPER205 Enter confined space
MSMWHS100 Follow WHS procedures

NATIONALLY RECOGNISED
TRAINING

Duration 2 days
Location This course can be trained at our Training Centre or we can train at your Workplace (conditions apply)
Cost Please call or email our office to obtain more information including pricing and dates
